

## So-PowerPoint PP-VIP6-1,3t-5/8"-11UNC with variable length

Artikel-Nr: 8600321

Suitable for all loads which swivel and tilt. From the factory, bolt lengths from F=50-180 can be suplied ( with an approximately 28 mm shank without thread ). When ordering implicitly indicate the required length. WLL is equivalent to that of VWBG-V, since a corresponding lower part is used. Connection only with RUD approved components e.g; VCÖH-6, oval link, PP 1,3tkg or the 6 mm VIP chain. Hint: The VIP chain connection is fool proof. When assembling the components, pay attention to the correct WLL allocation.

- Can be combined with most commercial lifting means without additional connecting element.
- Lifting points pivots 360°.
- Large distance between bolt-on surface and load to avoid damage.
- Rotatable at nominal WLL, 90° to the bolt-on directionLowest kinking possibility due to cardan joint.
- Suspension ring with enlarged pivoting area.
- Clear marking of the minimum WLL for all loading directions.
- Variable thread lengths are available for use of threaded holes and through hole fixtures.
- Non removable special bolt (this reduces the risk of non standard bolts).
- Component according to the test criterias of BG/DGUV "GS-OA-15-04".
- Quick and easy installation with just one bolt connection.
- Hand tightening with appropriate wrench is sufficient for a singular lift.
- Please observe torque instructions when lifting point is permanently installed resp. at constant swivelling operations and tilting/ turning actions.

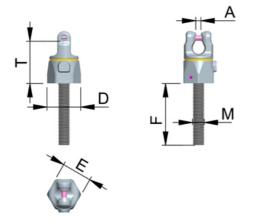

Other important RUD specific information and specialities to our RUD lifting points can be found in the specific user instruction.
